

Brookfield Infrastructure Reports 2020 Year-End Results

2021 distributions increased by 5% - 12th consecutive annual increase

Brookfield, News, February 3, 2021 – Brookfield Infrastructure (NYSE: BIP; TSX: BIP.UN) today announced its results for the fourth quarter ended December 31, 2020.

“2020 provided a unique backdrop to showcase the resilience and strength of our business,” said Sam Pollock, Chief Executive Officer of Brookfield Infrastructure. “We were also able to invest in high quality assets that were immediately accretive to our results. We are beginning 2021 with a robust liquidity position which will allow us to pursue attractive opportunities and convert them into meaningful investments.”

– per unit (split-adjusted) ⁶	\$ 0.86	\$ 0.77	\$ 3.13	\$ 3.06

Brookfield reported net income for the year of \$394 million (\$0.35 per unit) compared to \$233 million (\$0.06 per unit) in the prior year. Net income for the year benefited from organic growth across our regulated and contracted operations, contributions from recently completed acquisitions and a gain associated with the partial disposition of our Australian export terminal. These increases were partially offset by the impact of foreign exchange and higher depreciation associated with our annual revaluation process and new investments.

Funds from Operations (or FFO) for 2020 totaled \$1.45 billion, compared to \$1.38 billion in the prior year. This 5% increase reflects the highly regulated and contracted nature of our cash flows and embedded organic growth within the company. Results benefited from capital deployed across our segments and organic growth within our utilities, midstream and data segments. The single largest adverse impact on results was the depreciation of the Brazilian real, which reduced FFO by approximately \$100 million relative to 2019.

Segment Performance

Our utilities segment generated FFO of \$659 million in 2020, an annual increase of 6% after adjusting for the impact of a weaker Brazilian real. Our utility businesses performed well overall, reflecting the regulated and contractual frameworks under which we operate. Results benefited from inflation-indexation and \$340 million of capital commissioned into rate base during the last 12 months. These contributions were partially offset by delays in the recognition of certain connections revenue at our U.K. regulated distribution business.

FFO from our transport segment was \$590 million, which was relatively consistent with the prior year despite a challenging environment and disruptions in global trade. The segment benefited from the initial contribution of our North American rail operation and LNG export terminal, solid volumes across our rail networks and favorable rent settlements at our U.K. port operation. These contributions were offset by lower volumes at our toll roads and container ports.

FFO from our midstream segment totaled \$289 million, an increase of 18% compared to the prior year. Performance this year was excellent, with organic growth contributing 13% despite challenges in global energy markets. Our highly contracted cash flows were uninterrupted by the economic shutdowns and we benefited from robust transportation volumes and the commissioning of several new capital expenditure projects.

Our data segment delivered FFO of \$196 million, an increase of almost 50% compared to the prior year. This step-change increase is the result of organic growth and approximately \$1 billion of capital deployed into various strategic growth initiatives over the last 24 months. With respect to our ongoing growth capital projects, we have commissioned 22 MW of capacity at our South American data center operation and constructed approximately 150,000 fiber plugs at our French telecom operation in the last year. Combined, these two projects will contribute additional annual EBITDA of \$50 million (BIP's share - approximately \$10 million).

The following table presents FFO by segment:

Update on Strategic Initiatives

We completed several important initiatives in 2020:

- I. **Deployed \$2.5 billion in new investments and organic capital projects** - Expanded our presence in India's rapidly expanding data infrastructure sector with the acquisition of a large-scale

portfolio of telecom towers and made an investment in a world class LNG export terminal that is contributing to global decarbonization efforts.

- II. Generated over \$700 million through capital recycling** – Completed four sale processes and several asset-level financings that produced over \$700 million of proceeds, resulting in an average after-tax IRR of approximately 20% and approximately three times multiple of capital.

In addition, we recently reached an agreement to sell our North American district energy business in two separate transactions for total consideration of \$4.1 billion on an enterprise value basis. Net proceeds to BIP are expected to be approximately \$950 million. We will earn an IRR of over 30% on our investment and a multiple of invested capital of over six times.

Distribution and Dividend Increase

The Board of Directors has declared a quarterly distribution in the amount of \$0.51 per unit, payable on March 31, 2021 to unitholders of record as at the close of business on February 26, 2021. This distribution represents a 5% increase compared to the prior year. The regular quarterly dividends on the Cumulative Class A Preferred Limited Partnership Units, Series 1, Series 3, Series 5, Series 7, Series 9, Series 11, Series 13 and Series 14 have also been declared, as well as the dividend for BIP Investment Corporation Senior Preferred Shares, Series 1. In conjunction with the Partnership's distribution declaration, the Board of Directors of BIPC has declared an equivalent quarterly dividend of \$0.51 per share, also payable on March 31, 2021 to shareholders of record as at the close of business on February 26, 2021.

Brookfield Infrastructure Corporation Reports Fourth Quarter 2020 Results

The Board of Directors of Brookfield Infrastructure Corporation (“BIPC” or our “company”) (NYSE, TSX: BIPC) today has declared a quarterly dividend in the amount of \$0.51 per class A exchangeable subordinate voting share of BIPC (a “Share”), payable on March 31, 2021 to shareholders of record as at the close of business on February 26, 2021. This dividend is identical in amount per Share and has identical record and payment dates to the quarterly distribution announced today by BIP on BIP’s units.

The Shares of BIPC are structured with the intention of being economically equivalent to the non-voting limited partnership units of Brookfield Infrastructure Partnership L.P. (“BIP” or the “Partnership”) (NYSE: BIP; TSX: BIP.UN). We believe economic equivalence is achieved through identical dividends and distributions on the Shares and BIP’s units and each Share being exchangeable at the option of the holder for one BIP unit at any time. Given the economic equivalence, we expect that the market price of the Shares will be significantly impacted by the market price of BIP’s units and the combined business performance of our company and BIP as a whole. In addition to carefully considering the disclosure made in this news release in its entirety, shareholders are strongly encouraged to carefully review BIP’s letter to unitholders, supplemental information and its other continuous disclosure filings. BIP’s letter to unitholders and supplemental information are available at www.brookfield.com/infrastructure. Copies of the Partnership’s continuous disclosure filings are available electronically on EDGAR on the SEC’s website at www.sec.gov or on SEDAR at www.sedar.com.

Results

The net income and Funds from Operations (FFO) of BIPC is fully attributed to the Partnership and the earnings of BIPC are fully captured in the Partnership’s financial statements and results.

BIPC reported a net loss for the year of \$552 million compared to net income of \$197 million in the prior year. Earnings for the current year benefited from capital commissioned into rate base at our U.K. regulated distribution business and inflation-indexation at our Brazilian regulated gas transmission business. These positive impacts were more than offset by revaluation losses recognized on our Shares that are classified as liabilities under IFRS, and the impact of foreign exchange.

Our business generated FFO of \$401 million for the year, representing a 4% increase over the prior year after adjusting for a weaker Brazilian real. Results benefited from inflationary-indexation and additions to rate base, however these positive factors were more than offset by the impacts of foreign exchange and lower connections activity at our U.K. regulated distribution business.

Forward-looking statements in this news release include statements regarding the impact of the market price of BIP’s units and the combined business performance of our company and BIP as a whole on the market price of the Shares. Although Brookfield Infrastructure believes that these forward-looking statements and information

are based upon reasonable assumptions and expectations, the reader should not place undue reliance on them, or any other forward-looking statements or information in this news release. The future performance and prospects of Brookfield Infrastructure are subject to a number of known and unknown risks and uncertainties. Factors that could cause actual results of Brookfield Infrastructure to differ materially from those contemplated or implied by the statements in this news release include general economic conditions in the jurisdictions in which we operate and elsewhere which may impact the markets for our products and services, the ability to achieve growth within Brookfield Infrastructure's businesses and in particular completion on time and on budget of various large capital projects, which themselves depend on access to capital and continuing favorable commodity prices, and our ability to achieve the milestones necessary to deliver the targeted returns to our unitholders, the impact of market conditions on our businesses, the fact that success of Brookfield Infrastructure is dependent on market demand for an infrastructure company, which is unknown, the availability of equity and debt financing for Brookfield Infrastructure, the ability to effectively complete transactions in the competitive infrastructure space (including the ability to complete announced and potential transactions that may be subject to conditions precedent, and the inability to reach final agreement with counterparties to transactions being currently pursued, given that there can be no assurance that any such transaction will be agreed to or completed) and to integrate acquisitions into existing operations, the future performance of these acquisitions, changes in technology which have the potential to disrupt the business and industries in which we invest, the market conditions of key commodities, the price, supply or demand for which can have a significant impact upon the financial and operating performance of our business and other risks and factors described in the U.S. registration statement on Form F-1 and Canadian prospectus filed in connection with the distribution of the Shares on March 31, 2020 with securities regulators in Canada and the United States and the documents incorporated by reference therein, including under "Risk Factors" in the Partnership's most recent Annual Report on Form 20-F and other risks and factors that are described therein and in other documents filed by the Partnership and BIPC with the securities regulators in Canada and the United States. Except as required by law, Brookfield Infrastructure Corporation undertakes no obligation to publicly update or revise any forward-looking statements or information, whether as a result of new information, future events or otherwise.

1. Brookfield Infrastructure Corporation was established on August 30, 2019 by the Partnership. On March 30, 2020, the Partnership contributed its regulated utilities businesses in Brazil and the U.K. to our company. For the periods prior to March 30, 2020, the financial statements represent a combined carve-out of the assets, liabilities, revenues, expenses, and cash flows of the businesses that were contributed to our company effective March 30, 2020.
2. FFO is defined as net income excluding the impact of depreciation and amortization, deferred income taxes, breakage and transaction costs, and non-cash valuation gains or losses. We also exclude from FFO dividends paid on exchangeable shares of our company that are presented as interest expense, as well as interest expense on loans payable to the Partnership which represent the Partnership's investment in our company. A reconciliation of net income to FFO is available on page 17 of this release.

Notes:

Funds from operations in this statement is on a segmented basis and represents the operations of Brookfield Infrastructure Corporation net of charges associated with related liabilities and non-controlling interests. Adjusted EBITDA is defined as FFO excluding the impact of interest expense and other income or expenses. Net income attributable to shareholders includes net income attributable to the Partnership prior to and after the special distribution.

The Statements of Funds from Operations above are prepared on a basis that differs from net income as presented in Brookfield Infrastructure Corporation's Consolidated Statements of Operating Results on page 15 of this release, which is prepared in accordance with IFRS. Management uses FFO as a key measure to evaluate operating performance. Readers are encouraged to consider both measures in assessing our company's results.
