Q2 2021 Supplemental Information

Cautionary Statement Regarding Forward-Looking Statements

This Supplemental Information contains forward-looking information within the meaning of Canadian provincial securities laws and “forward-looking statements” within the meaning of certain securities laws including Section 27A of the U.S. Securities Act of 1933, as amended, Section 21E of the U.S. Securities Exchange Act of 1934, as amended, “safe harbor” provisions of the United States Private Securities Litigation Reform Act of 1995 and in any applicable Canadian securities regulations. We may make such statements in this report, in other filings with Canadian regulators or the SEC or in other communications. The words “expect”, “target”, “believe”, “objective”, “anticipate”, “plan”, “estimate”, “growth”, “increase”, “return”, “expand”, “maintain”, derivatives thereof and other expressions of similar import, or the negative variations thereof, and similar expressions of future or conditional verbs such as “will”, “may”, “should”, “could”, which are predictions of or indicate future events, trends or prospects and which do not relate to historical matters, identify forward-looking statements. Forward-looking statements in this Supplemental Information include among others, statements with respect to our assets tending to appreciate in value over time, current and proposed growth initiatives in our assets and operations, increases in FFO per unit and resulting capital appreciation, returns on capital and on equity, increasing demand for commodities and global movement of goods, volume increases in the businesses in which we operate, expected capital expenditures, the impact of planned capital projects by customers of our businesses, the extent of our corporate, general and administrative expenses, our ability to close acquisitions and the expected timing thereof, our capacity to take advantage of opportunities in the marketplace, the future prospects of the assets that Brookfield Infrastructure operates or will operate, ability to identify, acquire and integrate new acquisition opportunities, long-term targeted returns on our assets, sustainability of distribution levels, the level of distribution growth and payout ratios over the next several years and our expectations regarding returns to our unitholders as a result of such growth, operating results and margins for our business and each of our operations, future prospects for the markets for our products, Brookfield Infrastructure’s plans for growth through internal growth and capital investments, ability to achieve stated objectives, ability to drive operating efficiencies, return on capital expectations for the business, contract prices and regulated rates for our operations, our expected future maintenance and capital expenditures, commissioning of capital from our backlog, ability to deploy capital in accretive investments, impact on the business resulting from our view of future economic conditions, our ability to maintain sufficient financial liquidity, our ability to draw down funds under our bank credit facilities, our ability to secure financing through the issuance of equity or debt, expansions of existing operations, financing plans for operating companies, foreign currency management activities and other statements with respect to our beliefs, outlooks, plans, expectations and intentions. Although we believe that Brookfield Infrastructure’s anticipated future results, performance or achievements expressed or implied by the forward-looking statements and information are based upon reasonable assumptions and expectations, the reader should not place undue reliance on forward-looking statements and information because they involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of Brookfield Infrastructure to differ materially from anticipated future results, performance or achievements expressed or implied by such forward-looking statements and information.

Factors that could cause actual results to differ materially from those contemplated or implied by forward-looking statements include: general economic and financial conditions in the countries in which we do business which may impact market demand for our products and services, foreign currency risk, the level of government regulation affecting our businesses, the outcome and timing of various regulatory, legal and contractual issues, global credit and financial markets, the competitive business environment in the industries in which we operate, the competitive market for acquisitions and other growth opportunities, availability of equity and debt financing, the impact of health pandemics, such as the COVID-19, on our business and operations (including the availability, distribution and acceptance of effective vaccines), the completion of various large capital projects by customers of our businesses which themselves rely on access to capital and continued favourable commodity prices, weakening of demand for products and services in the markets for the commodities that underpin demand for our infrastructure, our ability to complete transactions in the competitive infrastructure space (including the transactions referred to in this presentation, some of which remain subject to the satisfaction of conditions precedent, and the inability to reach final agreement with counterparties to transactions referred to in this presentation as being currently pursued, given that there can be no assurance that any such transaction will be agreed to or completed) and to integrate acquisitions into existing operations, our ability to complete large capital expansion projects on time and within budget, our ability to achieve the milestones necessary to deliver targeted returns to our unitholders, including targeted distribution growth, ability to negotiate favourable take-or-pay contractual terms, traffic volumes on our toll roads, our ability to obtain relevant regulatory approvals and satisfy conditions precedent required to complete acquisitions, acts of God, weather events, or similar events outside of our control, and other risks and factors detailed from time to time in documents filed by Brookfield Infrastructure with the securities regulators in Canada and the United States, including Brookfield Infrastructure’s most recent Annual Report on Form 20-F under the heading “Risk Factors”.

We caution that the foregoing list of important factors that may affect future results is not exhaustive. When relying on our forward-looking statements to make decisions with respect to Brookfield Infrastructure, investors and others should carefully consider the foregoing factors and other uncertainties and potential events. Except as required by law, Brookfield Infrastructure undertakes no obligation to publicly update or revise any forward-looking statements or information, whether written or oral, that may be as a result of new information, future events or otherwise.

CAUTIONARY STATEMENT REGARDING USE OF NON-IFRS, ACCOUNTING MEASURES

Although our financial results are determined in accordance with International Financial Reporting Standards (IFRS), the basis of presentation throughout much of this report differs from IFRS in that it is organized by business segment and utilizes, funds from operations (FFO), adjusted funds from operations (AFFO), adjusted EBITDA and invested capital as important measures. This is reflective of how we manage the business and, in our opinion, enables the reader to better understand our affairs. We provide a reconciliation to the most directly comparable IFRS measure on pages 33-43 of this Supplemental Information. Readers are encouraged to consider both measures in assessing Brookfield Infrastructure’s results.

BUSINESS ENVIRONMENT AND RISKS

Brookfield Infrastructure’s financial results are impacted by various factors, including the performance of each of our operations and various external factors influencing the specific segments and geographic locations in which we operate; macro-economic factors such as economic growth, changes in currency, inflation and interest rates; regulatory requirements and initiatives; and litigation and claims that arise in the normal course of business. These and other factors are described in Brookfield Infrastructure’s most recent Annual Report on Form 20-F which is available on our website at www.brookfieldinfrastructure.com and at www.sec.gov/edgar.shtml and www.sedar.com.

PERFORMANCE HIGHLIGHTS

- Generated FFO of \$394 million during the second quarter, or \$0.85 per unit, an increase of 18% over the prior year
 - Results for the quarter benefited from organic growth of 9%, contributions from capital recycling and higher volumes associated with the economic recovery
- Distribution of \$0.51 per unit represents an increase of 5%
- Payout ratio and return on invested capital of 72% and 13%, respectively, after adjusting for foreign currency impacts⁶
- Net income increased compared to the prior year as the current period benefited from organic growth as well as gains on the sale of our district energy operation in Canada and our portfolio of smart meters in the U.K.
 - These positive factors were partially offset by an increase in deferred taxes associated with U.K. tax rates which reduced income by more than \$100 million
- Total assets were relatively consistent with year-end, as increases driven by acquisitions and the mark-to-market of our financial assets were more than offset by the impacts of dispositions, foreign exchange and depreciation and amortization

6. Brazilian real normalized using approximately 4.20 (the rate prior to the impact of the economic shutdowns)

OPERATIONS

- Deployed ~\$235 million of growth capital expenditures to increase rate base at our utilities operations and add capacity at our transport and data businesses
- Strong performance at our U.K. residential distribution business as new connections activity returned to pre-shutdown levels and connections sales exceeded planned levels by 21% supported by robust take-up for our water offering
- Deployed ~\$30 million (BIP's share - ~\$10 million) at our North American residential infrastructure business into two tuck-in acquisitions allowing us to enter new markets in the northeast U.S.
- Commenced an expansion of one of our existing data center facilities in Australia and the construction of a greenfield data center in New Zealand
 - These projects are anchored by leading hyperscale customers and scheduled to be commissioned in late 2022 with a total expected capital spend of ~\$40 million (BIP's share)
- Our U.K. port operation secured a number of long-term, inflation linked contracts which will increase container and bulks capacity
 - These contracts will generate run-rate EBITDA of over ~\$10 million (BIP's share - \$6 million) and support ~\$30 million of capital projects (BIP's share - \$18 million)
- Local currency EBITDA at our French telecom business increased 13% due to organic growth supported by strong interest from mobile network operator (MNO) customers for its in-place tower infrastructure and build-to-suit capabilities

STRATEGIC INITIATIVES

- Announced a revised offer to acquire all of the outstanding shares of Inter Pipeline for C\$20.00 cash or 0.25 shares of BIPC
 - If successful, BIP could deploy ~\$2 billion, inclusive of consideration in the form of class A shares of BIPC, if elected
- Established a joint venture with Digital Realty focused on development, ownership and operation of hyperscale data centers in India
- Continue to progress our capital recycling program with the completion of two sales which generated over \$1.3 billion of net proceeds (BIP's share)
 - Closed the sale of our North American district energy business for net proceeds of \$1.0 billion; generated an IRR of 30% and MoC of over 6x
 - Closed the sale of our 1.6 million smart meter portfolio in the U.K. raising net proceeds of ~\$350 million (BIP's share)

FINANCING AND LIQUIDITY

- Current liquidity at the corporate level exceeds \$5 billion¹
 - Raised \$250 million of fixed rate subordinated notes to redeem our Series 5 Class A Preferred Units which reset on September 30, 2021
 - Capitalized on prevailing low rate environment as we opportunistically refinanced ~\$7 billion of asset-level debt during the quarter
- Well-laddered debt profile with ~80% of asset level funding sourced under long-term fixed rate financing

1. Corporate liquidity presented on a proforma basis to include the proceeds from the sale of our U.S. district energy business, as well as a \$1 billion commitment from Brookfield in support of our bid to acquire Inter Pipeline Ltd. (conditional on a successful tender offer)

OUR MISSION

- To own and operate a globally diversified portfolio of high quality infrastructure assets that will generate sustainable and growing distributions over the long-term for our unitholders

PERFORMANCE TARGETS AND KEY MEASURES

- Target a 12% to 15% total annual return on invested capital measured over the long term
- Expect to generate returns from in-place cash flows plus growth through investments in upgrades and expansions of our asset base
- Growth in FFO per unit is one of the key performance metrics that we use to assess our ability to sustainably increase distributions in future periods

BASIS OF PRESENTATION

- Our consolidated financial statements are prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB)
- For each operating segment, this Supplemental Information outlines Brookfield Infrastructure's proportionate share of results in order to demonstrate the impact of key value drivers of each operating segment on the partnership's overall performance

Our payout ratio is determined based on the amount of cash flow generated in our businesses that is available for distribution

- Objective is to pay a distribution that is sustainable on a long-term basis while retaining sufficient liquidity within operations to fund recurring growth capital expenditures and general corporate requirements
- We fund all of our growth initiatives through a combination of issuances of common equity, preferred equity and corporate debt, proceeds from asset sales and retained cash flows
 - Available funding and assessment of corporate liquidity is undertaken prior to committing to all new investments and capital projects
- Distributions are determined on the basis of the proportionate cash flow generating capacity of our businesses. We monitor proportionate cash flow from operations rather than focusing exclusively on its consolidated equivalent, since we exercise co-control or significant influence over decision-making with respect to distributions from our unconsolidated subsidiaries:
 - Each of our businesses is required to distribute all of its available cash (generally defined as cash on hand less any amounts reserved for committed growth projects)
 - Our governance arrangements over these businesses effectively provide us with a veto over any decision not to distribute all available cash flow. That is, any decision not to distribute available cash flow in these businesses requires our consent

BIP has a conservative payout ratio underpinned by stable, highly regulated or contracted cash flows generated from operations

- We believe that a payout of 60-70% of FFO is appropriate
- Targeting 5% to 9% annual distribution growth, in light of expected per unit FFO growth
- Distribution payout is reviewed with the Board of Directors in the first quarter of each year
- The Board of Directors has declared a quarterly distribution in the amount of \$0.51 per unit, payable on September 29, 2021 to unitholders of record as at the close of business on August 31, 2021. This quarterly distribution represents a 5% increase compared to the prior year
 - Distributions have grown at a **compound annual growth rate of 10%** over the last 10 years
- Below is a summary of our distribution history since the spin-off

 2. 2008 distribution was prorated from spin-off

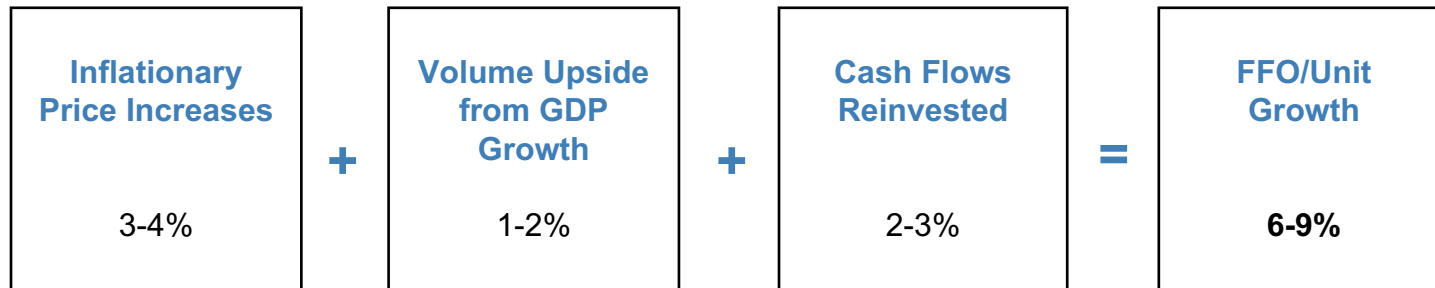

Over the last 10 years, the Partnership has been able to achieve its target payout ratio of 60-70% of funds from operations while increasing its distribution by an average of 10%

- Based on our distribution track record, the Partnership's average distribution payout ratio for the last 10 years is 69% of FFO, as shown below

Organic growth demonstrates our ability to deliver sustainable cash flow growth

- Our business is well-positioned to deliver per unit FFO organic growth of 6-9%
- The three principle drivers of recurring annual cash flow growth embedded in our businesses are:

- In order to showcase the sustainability of our cash flow growth year-over-year, we calculate organic growth prior to fees and corporate expenses and remove the following impacts:
 - Contributions from acquisitions and dispositions completed in the last 12 months
 - Impacts of foreign exchange since the previous period
 - Movements in results at our gas storage operations as cash flows can be impacted by volatility caused by movements in spreads relating to natural gas prices

Current environment is very supportive for organic growth at or above the high-end of our target range

- Inflationary pressures in all markets will benefit 75% of our FFO
- Significant GDP growth forecasted in many parts of the global economy could impact 40% of our business
- Willingness of customers to expand existing operations is heightened during economic expansions which should lead to additional opportunities to grow our capital backlog

- Own and operate a diversified portfolio of high-quality, long-life utilities, transport, midstream and data assets
- Generate stable cash flows with ~95% of adjusted EBITDA supported by regulated or long-term contracts
- Leverage Brookfield’s best in-class operating segments to extract additional value from investments

1. During the fourth quarter of 2020, our partnership conducted a comprehensive review of our operating segments. To better align with how our partnership reviews and evaluates our operations, our district energy and Indian natural gas operations were reallocated to our regulated distribution and regulated transmission subsegments, respectively, within our utilities segment. Our Australian export terminal was reallocated to our ports subsegment, within our transport segment. Our regulated distribution subsegment was renamed commercial and residential distribution, our ports subsegment was renamed diversified terminals, our energy segment was renamed to midstream and our data infrastructure segment was renamed to data

OPERATING SEGMENTS

SEGMENT OVERVIEW

- Businesses that generate long-term returns on regulated or contractual asset base (rate base)
- Rate base increases with capital that we invest to upgrade and/or expand our systems
- Virtually all of adjusted EBITDA are supported by regulated or contractual revenues

OBJECTIVES

- Invest capital to increase our rate base
- Earn an attractive return on rate base
- Provide safe and reliable service to our customers

OPERATIONS

- Regulated Transmission:
 - ~4,200 km of natural gas pipelines in North America, South America and India
 - ~5,300 km of transmission lines in Brazil, of which ~2,700 km are operational
- Commercial & Residential Distribution:
 - Provides residential infrastructure services to ~1.9 million customers annually in the U.S. and Canada and ~330,000 long-term contracted sub-metering services within Canada
 - ~7.0 million connections, predominantly electricity and natural gas

The following table presents selected key performance metrics of our utilities segment:

US\$ MILLIONS, UNAUDITED	Three Months Ended June 30		Six Months Ended June 30

Adjusted funds from operations (AFFO)	\$ 179	\$ 150	\$ 340	\$ 306
Return on rate base ^{1,2}	12%	12%	12%	12%

1. Return on rate base is adjusted EBITDA divided by time weighted average rate base

2. Return on rate base excludes impact of connections revenue at our U.K. regulated distribution business, a return of capital component from earnings generated at our Brazilian transmission businesses and our North America district energy operation as we agreed to sell the business in February 2021

- FFO of \$190 million in Q2'21 compared to \$157 million in the prior year
 - FFO increased by 21% due to a recovery in connections activity at our U.K. regulated distribution business, as well as organic growth driven by inflation indexation and capital commissioned into rate base
 - Results also benefited from the contribution associated with the acquisition of the remaining interest in our Brazilian regulated gas transmission operation completed at the end of April
 - These contributions were partially offset by the sale of our smart meter portfolio and North American transmission operation

FINANCIAL RESULTS

- Adjusted EBITDA and FFO were \$251 million and \$190 million, respectively, versus \$203 million and \$157 million, respectively, in the prior year
 - Commercial & Residential Distribution: Adjusted EBITDA and FFO benefited from inflation indexation, capital commissioned into rate base over the last 12 months, and a recovery in connections activity at our U.K. regulated distribution business
 - These positive factors were partially offset by the loss of earnings associated with the sale of our portfolio of smart meters in the U.K. completed in May
 - Regulated Transmission: Adjusted EBITDA and FFO benefited from a 24% annual inflationary tariff adjustment at our Brazilian regulated gas transmission operation, the ongoing expansion of our Brazilian electricity transmission network, and the acquisition of the remaining 10% interest in our Brazilian regulated gas transmission business
 - These positive factors were partially offset by the loss of earnings from the sale of our North American transmission operation

1. Rate base and capital backlog excludes our North America district energy operation as we agreed to sell the business in February 2021

CAPITAL BACKLOG

Projects that we have been awarded and/or filed with regulators with anticipated commissioning into rate base in the next two to three years

- Ended the period with \$0.9 billion of total capital to be commissioned into rate base; 12% decrease compared to year-end
 - New connection mandates awarded were more than offset by capital projects commissioned into rate base and the impact of asset sales
- The largest contributors to capital expected to be commissioned into rate base include:
 - ~\$540 million at our U.K. regulated distribution business;
 - ~\$200 million at our Brazilian electricity transmission business; and
 - ~\$180 million at our North American residential infrastructure business to grow the customer base

RATE BASE

- Rate base increased compared to year-end due to the positive impacts of new connections at our U.K. regulated distribution business, inflation-indexation at our Brazilian regulated gas transmission business and the impact of foreign exchange

SEGMENT OVERVIEW

- Provide transportation for freight, commodities and passengers
- Rail and toll road revenues are subject to regulatory price ceilings, while ports are primarily unregulated

OBJECTIVES

- Increase throughput of existing assets
- Expand networks in a capital efficient manner to support incremental customer demand
- Provide safe and reliable service for our customers

OPERATIONS

- Rail
 - 116 short line freight railroads comprising over 22,000 km of track in North America and Europe
 - Sole provider of rail network in southern half of Western Australia with ~5,500 km of track and operator of ~4,800 km of rail in Brazil
- Toll Roads
 - ~3,800 km of motorways in Brazil, Chile, Peru and India
- Diversified Terminals
 - 13 terminals in North America, U.K., and Australia
 - ~25 million tonnes per annum LNG export terminal in the U.S. and ~85 million tonnes per annum export facility in Australia

The following table presents selected key performance metrics for our transport segment:

1. Adjusted EBITDA margin is adjusted EBITDA divided by revenues

- FFO of \$173 million in Q2'21 compared to \$127 million in the prior year reflects a 26% increase on a same-store basis
 - Results benefited from the re-opening of economies as overall volumes across our business exceeded the prior year by 14%
 - Results also benefited from the contribution of our U.S. LNG export terminal acquired last year, partially offset by the partial sale of our Australian export terminal

Total	\$ 239	\$ 174	\$ 472	\$ 369	\$ 173	\$ 127	\$ 335	\$ 266

FINANCIAL RESULTS

- Adjusted EBITDA and FFO were \$239 million and \$173 million, respectively, versus \$174 million and \$127 million, respectively, in the prior year
 - Rail: Adjusted EBITDA and FFO benefited from a 4% increase in volumes across our rail business due to higher economic activity in the U.S., a new task in Australia and a strong agriculture harvest in Brazil
 - Toll Roads: Adjusted EBITDA and FFO increased due to the return to pre-shutdown traffic volumes, which were partially offset by the planned hand-back of a state concession at our Brazilian toll road operation
 - Diversified Terminals: Adjusted EBITDA and FFO benefited from the contribution from our U.S. LNG export terminal acquired last year and an 18% increase in container and bulk volumes driven by a recovery in economic activity
 - These positive factors were partially offset by the loss of earnings associated with the partial sale of our Australian export terminal completed in the fourth quarter of 2020

Capital Backlog

We expect enhancements to our networks over the next two to three years to expand capacity and support additional volumes, leading to cash flow growth over the long term

The following table presents our proportionate share of growth capital backlog:

US\$ MILLIONS, UNAUDITED	For the Three Month Period Ended June 30, 2021	For the Six Month Period Ended June 30, 2021	For the 12 Month Period Ended December 31, 2020

- Consists of the following types of projects:
 - Rail: Upgrading and expanding our network to capture volume growth from incremental activity in the sectors we serve
 - Toll roads: Expanding the capacity of our roads by increasing and widening lanes on certain routes to support traffic growth
 - Diversified Terminals: Increasing capacity of our terminals by deepening the berths and expanding, enhancing and modernizing our existing infrastructure
- Largest contributors to capital to be commissioned over the next two to three years include ~\$465 million at our South American toll road businesses and ~\$190 million to increase capacity at our U.S. LNG export terminal

SEGMENT OVERVIEW

- Systems that provide transmission and storage services
- Profitability based on the volume and price achieved for the provision of these services
- Businesses are either unregulated or subject to price ceilings

OBJECTIVES

- Satisfy customer growth requirements by increasing the utilization of our assets and expanding our capacity in a capital efficient manner
- Provide safe and reliable service to our customers

OPERATIONS

- Midstream:
 - ~15,000 km of natural gas transmission pipelines in the U.S.
 - ~600 billion cubic feet of natural gas storage in the U.S. and Canada
 - 16 natural gas processing plants with ~2.9 Bcf per day of total processing capacity and ~3,400 km of gas gathering pipelines in Canada

The following table presents selected key performance metrics for our midstream segment:

US\$ MILLIONS, UNAUDITED	Three Months Ended June 30		Six Months Ended June 30

Adjusted funds from operations (AFFO)	\$ 39	\$ 35	\$ 177	\$ 104

1. Adjusted EBITDA margin is adjusted EBITDA divided by revenues

- FFO of \$60 million in Q2'21 was consistent with the prior year
 - Results for the second quarter grew by 14% on a same-store basis, reflecting strong gas transportation volumes and growth initiatives commissioned at our U.S. gas pipeline last March
 - These positive factors offset by the partial monetization of our stake in our U.S. gas pipeline last quarter; net-to-BIP ownership decreased from 50% to 37.5%

The following table presents our midstream segment's proportionate share of financial results:

Net income	\$ 1	\$ 12	\$ 95	\$ 37

FINANCIAL RESULTS

- Adjusted EBITDA and FFO were \$82 million and \$60 million, respectively, versus \$82 million and \$60 million, respectively, in the prior year
 - Adjusted EBITDA and FFO benefited from strong gas transportation volumes and the commissioning of the second phase of our Gulf Coast expansion project in March at our U.S. gas pipeline
 - These positive factors were offset by a full quarter impact of the monetization of a 12.5% stake in our U.S. gas pipeline completed in March

SEGMENT OVERVIEW

- Businesses that provide essential services and critical infrastructure to media broadcasting and telecom sectors
- Adjusted EBITDA underpinned by both regulated and unregulated services, secured by long-term inflation-linked contracts

OBJECTIVES

- Increase profitability through site rental revenue growth
- Maintain high level of service by managing availability and reliability of our customers network
- Deploy capital in response to customer demands for increased densification of their networks

OPERATIONS

- Data Transmission & Distribution:
 - ~141,000 operational telecom towers in India
 - ~7,000 towers and active rooftop sites in France
 - ~10,000 km of fiber located in France and Brazil
 - ~1,600 cell sites and over 11,500 km of fiber optic cable in New Zealand
 - ~2,100 active telecom towers and over 70 distributed antenna systems, primarily in the U.K.
- Data Storage:
 - 54 data centers, with ~1.6 million square feet of raised floors and 200 megawatts of critical load capacity

The following table presents selected key performance metrics for our data segment:

1. Adjusted EBITDA margin is adjusted EBITDA divided by revenues

- FFO of \$60 million in Q2'21 increased by 40% compared to \$43 million in the prior year
 - Results benefited from 10% organic growth supported by additional points-of-presence and the roll-out of our fiber-to-the-home program at our French telecom business
 - Results also benefited from the contribution of our Indian telecom business acquired last year

The following table presents our data segment's proportionate share of financial results:

FINANCIAL RESULTS

- Adjusted EBITDA and FFO were \$84 million and \$60 million, respectively, versus \$53 million and \$43 million, respectively, in the prior year
 - Data Transmission & Distribution: Adjusted EBITDA and FFO benefited from the roll-out of growth initiatives at our French telecom business and the contribution from our Indian telecom business acquired last year
 - The roll-out of our build-to-suit tower program at our French telecom business is accelerating, with ~265 sites added over the last 12 months supported by record activations in June
 - Data Storage: Adjusted EBITDA and FFO decreased as the contribution from capacity commissioned at our Brazilian data center operation over the last 12 months was more than offset by lower sales at our U.S. operation

Capital Backlog

Additions and improvements to our networks and sites over the next two or three years that are expected to accommodate growing data consumption, leading to cash flow growth over the long term

The following table presents our proportionate share of growth capital backlog:

Total capital to be commissioned	\$	507	\$	507	\$ 415

- Capital to be commissioned includes ~\$400 million within our Data Transmission & Distribution operations and ~\$110 million at our Data Storage operations:
 - Data Transmission & Distribution: Includes ~\$175 million related to the build-out of additional contracted towers at our Indian telecom towers business, as well as ~\$160 million and ~\$35 million related to roll-out of our fiber-to-the-home program and additional points-of-presence, respectively, at our French telecom business
 - Data Storage: Increasing the capacity of our data storage network with the build-out of new sites or expansion of existing data centers
 - Total capital to be commissioned primarily relates to the construction of several new facilities at our South American and Australian operations, the majority of which are underpinned by attractive long-term contracts with investment grade, global hyperscale customers

The following table presents the components of corporate on a proportionate basis:

FINANCIAL RESULTS

- General and administrative costs were relatively consistent with prior year
 - Anticipate corporate and administrative costs of \$10 to \$12 million per year, excluding the base management fee
- We pay Brookfield an annual base management fee equal to 1.25% of our market value, plus recourse debt net of cash and financial assets
 - Base management fee increased over the prior year due to an increase in our unit price
- Other income includes interest and dividend income, as well as realized gains or losses earned on corporate financial assets
- Corporate financing costs include interest expense and standby fees on our committed credit facility, less interest earned on cash balances

Total liquidity was ~\$5.0 billion at June 30, 2021, comprised of the following:

US\$ MILLIONS, UNAUDITED	June 30, 2021	Dec. 31, 2020	Proforma ¹

1. Corporate cash and financial assets, commercial paper and deposit from parent are presented on a proforma basis to include the expected impact of the proceeds from the sale of our U.S. district energy business. Subordinated corporate credit facility is presented on a proforma basis to include a \$1 billion commitment from Brookfield in support of our bid to acquire Inter Pipeline Ltd. (conditional on a successful tender offer)
2. Includes a \$1,975 million committed corporate credit facility and a \$1 billion temporary bulge facility. As of June 30, 2021, our committed corporate credit facility and temporary bulge facility were undrawn and we had commercial paper outstanding of \$496 million
3. Brookfield Infrastructure, from time to time, will place deposits with, or receive deposits from Brookfield. The deposit bears interest at market rates and was provided to Brookfield Infrastructure to utilize excess cash held by the parent to repay Brookfield Infrastructure's draws on the corporate credit facility

- We maintain sufficient liquidity at all times to participate in attractive opportunities as they arise, withstand sudden adverse changes in economic circumstances and maintain a relatively high payout of our FFO to unitholders
- Principal sources of liquidity are cash flows from operations, undrawn credit facilities, proceeds from capital recycling and access to public and private capital markets
- We may, from time to time, invest in financial assets comprised mainly of liquid equity and debt infrastructure securities in order to earn attractive short-term returns and for strategic purpose

Maturity Profile

We finance our assets principally at the operating company level with debt that generally has long-term maturities, few restrictive covenants and no recourse to either Brookfield Infrastructure or our other operations.

On a proportionate basis as of June 30, 2021, scheduled principal repayments over the next five years are as follows:

We fund growth initiatives with proceeds from capital recycling, capital market issuances and retained operating cash flows

- We target retaining 15% of our operating cash flows (FFO) for the equity component of recurring growth capital expenditures
- We look to fund new investment opportunities and large-scale growth capital expenditure projects with proceeds from capital recycling and capital market issuances

Over the last 3 years, we have deployed \$5.0 billion in acquisitions and organic growth initiatives, of which over \$4.2 billion has been funded through our capital recycling program and capital market issuances

Foreign Currency Hedging Strategy

To the extent that it is economic to do so, we hedge a portion of our equity investments and/or cash flows exposed to foreign currencies. The following principles form the basis of our foreign currency hedging strategy:

- We leverage any natural hedges that may exist within our operations
- We utilize local currency debt financing to the extent possible
- We may utilize derivative contracts to the extent that natural hedges are insufficient

The following table presents our hedged position in foreign currencies as at June 30, 2021:

- On March 31, 2020, the partnership completed a special distribution whereby unitholders received one class A exchangeable subordinate voting share for every nine units held
 - On March 31, 2020, 46.3 million class A shares of BIPC were issued; as at June 30, 2021, 1.4 million shares had been exchanged into limited partnership units
- The general partner may be entitled to incentive distribution rights, as follows:
 - To the extent quarterly distributions on partnership units are greater than \$0.183², the general partner is entitled to 15% of incremental distributions above this threshold until distributions reach \$0.198² per unit
 - To the extent quarterly distributions on partnership units are greater than \$0.198², the general partner is entitled to 25% of incremental distributions above this threshold
- Incentive distributions of \$50 million were paid during the quarter versus \$46 million in the prior year as a result of the 5% increase in our distribution on partnership units
- 70 million preferred units outstanding at June 30, 2021; 54 million were issued at par value of C\$25 per unit, 16 million were issued at par value of US\$25 per unit
 - During the three-months ended June 30, 2021, preferred unit distributions of \$18 million were paid

1. As at June 30, 2021, 4.8 million exchangeable limited partnership units had been exchanged into limited partnership units
 2. Thresholds for incentive distribution have been adjusted to account for the impact of the special distribution

1. Includes draws made under Brookfield's private funds credit facility used to bridge acquisitions over period-end. Borrowings made under the facility are secured by limited partner commitments and are non-recourse to the Partnership

- **Funds from operations (FFO), adjusted funds from operations (AFFO), adjusted EBITDA, adjusted earnings, invested capital** and their per share equivalents, where applicable, are non-IFRS measures which do not have any standard meaning prescribed by IFRS and therefore may not be comparable to similar measures presented by other companies
 - FFO, AFFO, adjusted earnings and invested capital are reconciled to Net Income and Partnership capital, respectively, the closest measures determined under IFRS on pages 34, 35 and 41, respectively
- **FFO** is defined as net income excluding the impact of depreciation and amortization, deferred income taxes, breakage and transaction costs, and non-cash valuation gains or losses
 - Brookfield Infrastructure uses FFO to assess its operating results
- **Adjusted EBITDA** is defined as FFO excluding the impact of interest expense, and other income or expenses
 - Brookfield Infrastructure uses Adjusted EBITDA as a measure of operating performance
- **Adjusted Earnings** is defined as net income attributable to our partnership, excluding the impact of depreciation and amortization expense from revaluing property, plant and equipment and the effects of purchase price accounting, mark-to-market on hedging items and disposition gains or losses
- **AFFO** is a measure of our long-term sustainable performance and is calculated as FFO less capital expenditures required to maintain the current performance of our operations (maintenance capital expenditures)
- **Invested Capital** tracks the initial investment that we make in a business plus all cash flow that we re-invest in the business
